The screenshot shows the Scopus website interface. At the top, the Scopus logo is on the left, and navigation links for Scopus, SciVal, and a user profile (Jorge Daza) with Logout and Help options are on the right. Below this is a dark teal navigation bar with tabs for Search, Alerts, and Lists. The Search tab is active, and within it, the 'Author search' sub-tab is highlighted with a red rectangle. The search area contains several input fields: a text box with 'daza', an 'Affiliation...' dropdown with 'e.g. University of Toronto...', and an 'ORCID...' field with 'e.g. 1111-2222-3333-4444'. To the right of these is a text box with 'jorge' and a search button with a magnifying glass icon. Below the search fields is a 'Limit to:' section with checkboxes for Subject Areas: Life Sciences, Health Sciences, Physical Sciences, and Social Sciences & Humanities. On the far right, there is a help text block explaining the Scopus Author Identifier algorithm.

To determine which author names should be grouped together under a single identifier number, the Scopus Author Identifier uses an algorithm that matches author names based on their affiliation, address, subject area, source title, dates of publication, citations, and co-authors. Documents with insufficient data may not be matched, this can lead to more than one entry in the results list for the same author. By default, only details pages matched to more than one document in Scopus are shown in search results. [About Scopus Author Identifier](#)
